The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an illumination device comprising a first and a second group of light sources being supplied by a first and a second power supply; a first and a second setting apparatus, wherein the first setting apparatus is operable to set a power output of the first and, at the same time, a power output of the second power supply, the first setting apparatus including a first and a second potentiometer, the first and second potentiometer being coupled to each other, wherein the first potentiometer is used to set the power output of the first power supply, and the second potentiometer is used to set the power output of the second power supply; and the second setting apparatus is operable to set the power output of only the second power supply, the second setting including a potentiometer which is connected in parallel with the second potentiometer of the first setting apparatus; and connection apparatus for coupling the circuit arrangement to the first and second group of light sources as required in claim 1.

4. The remaining dependent claims are allowable for at least above reason.
